RAISE MORE DUCKS .- I could never understand why our farmers through the State did not keep ducks; as a matter of profit they are more profitable that hens. It may be the impression that, in order to keep ducks, a person must have a pond or stream of water near by, has deterred many from keeping them; but there is no need of anything of the kind. It is true that it is better to have a pond or stream, but you can raise ducks just as well elsewhere. I know of parties that are very successful in raising them, that have only a shallow tub set in the ground, and filled from the pump occasionally. In fact, the trouble of raising ducks, and about the only one, is letting the young go into water too soon after they leave the nest. When I speak of the profits from ducks, I do not have reference to the common duck that is seen every day. I mean a breed of ducks that will weigh twelve pounds to the pair, alive, such as the Rouen and Aylesbury, and both excellent layers, easily kept and reared, and being very large and excellent for the market, and it costs no more to rear them than the common ducks. that will only weigh on the average about eight pounds to the pair. The Rouen is a very handsome duck in plumage; the drake has a glossy green head and neck down to a white ring on his neck, the lower part of the body is a beautiful green brown gray, and shaded with brown on the back. The duck is of a beautiful brown, with about every feather shaded on the outer edge with black. They are acknowledged the best of the varieties, laving very early, and continuing through the season, and late in winter. The Aylesbury is pure white, both the duck and drake, and about the same size as the Rouen. Both become very familiar, and being large and heavy, do not care to roam as

THE DRUNKARD'S CURE. - Some months ago a gentleman advertised that he had discovered a sure specific for the cure of drunkenness. He would not divulge the secret of what compounds he used, but turnished medicine at so much per bottle. He did not have as many applicants for cure as he expected, considering the extent of the disease. In fact, the more malignant cases did not seem anxious for relief. They rather appeared to enjoy their malady. -A few, however, placed themselves under treatment, and some were cured-whether by taking the medicine or by not taking any strong drinks, we are not prepared to say. One of the cured ones had faith in the medicine, rigidly carried out the directions of the doctor, and now has not the least taste for intoxicating drinks; whereas, one year ago he was an inebriate, and could not get along with less than a pint to a quart of whiskey per day. He said that he had, at some trouble and expense, procured the recipe for the preparation of the medicine, which he has published for the benefit of suffering humanity. It is as follows:-Sulphate of iron, 5 grains; pepermint water, 11 drachms; spirit of nutmeg, 1 drachm; twice a day. This preperation acts as a tonic and stimulant, and so partially supplies the place of the accustomed liquor, and prevents that absolute physical and moral prostration that follows a sudden breaking off from the use of stimulating drinks. It is to be taken in quantities equal to an ordinary dram, and as often as the desire for a dram returns. Any druggist can prepare the prescription.

much as the common kind.—Maine Farmer.

A good story is told of Mr. Stanbery, to the effect that a note addressed to his son, requesting him to join a party to learn "the German" fell by some mistake into the hands of the elder Mr. Stanbery, who answered very politely, with an expression of regret, that his professional engagements would prevent his attempting just now the acquirement of a new lan-

A telegram to the New England press states that "the vanity of three or four of the Managers of the impeachment is greater than their patriotism," upon which the New York Times ventures to say that as they are all known to be modest, self-distrusting and retiring gentlemen, this must be regarded as a very severe

impeachment of their patriotism. A young Frenchman has been condemned to death for stabbing a widow woman in thirtynine places, and throwing her body down a well. She grawled up the chain and appeared to testify against him, the jury, very singularly, finding no "extenuating circumstances."

YOUNG MEN, Especially, who have become the victims of solitary vice, that dreadful and destructive habit which annually sweeps to an ultimely grave thousands of Young Men of the most excellent talents and brilliant intellect, who might otherwise have entranced listening Senators with the thunders of eloquence, or waked to estacy the living lyre, may call with full

He who places himself under the care of Dr. J. may religiously confide in his honor as a gentleman, and confidently rely upon his skill as a physician.

ORGANIC WEAKNESS Immediately cured and full vigor restored. This distressing affection, which renders life miserable and marriage impossible, is the penalty paid by the victims of impropriety .--Young persons are too apt to commit excesses from not being aware of the dreadful consequences that may ensue. Now, who that understands the subject will pretend to deny that the power of procreation is lost sooner by those falling into improper habits than by the prudent? Besides being deprived of the pleasure of healthy offspring, the most serious and destructive symptoms of both body and mind arise. The System becomes deranged, the Physical and Mental Functions Weakened,

gestion, Constitutional Debility, and Wasting of the Frame, Consumption, Decay and Death. DR. JOHNSON, Member of the Royal College of Surgeons, London, Graduate of one of the most eminent Colleges in the United States, and the greater part of whose life has been spent in the hospit-als of London, Paris, Philadelphia, and elsewhere, has effected some of the most astonishing cures that were ever known, many troubled with ringing in the head and ears when asleop, great nervousness, being alarmed at sudden

were cured immediately.

Dr. J. addresses all those who have injured themselves by improper indulgence and solitary habits, which ruin both body and mind, unlitting them for either business, study, society or marriage. These are some of the sad and melancholy effects produced by early habits of youth, viz:

Weakness of the Back and Limbs, Pains in the Head, Dimness of Sight, Loss of Muscular Power, Palpitation of the Heart, Dyspepsia, Nervous Irritability, Derangement of the Digestive Functions, General Debility, Symptoms of Consumption, &c.

MENTALLY.—The fearful effects on the mind are much to be dreaded. Loss of Memory.

Forebodings, Averson to Society, Self Distrust, Love of Solitude, Timidity, &c., are some of the evils produced: Thousands of persons of all ages can now judge what is the cause of their declining health, losing their vigor, becoming weak, pale, ner-yous and emacated, having a singular appear-

YOUNG MEN, Who have injured themselves by a cer tain practice, indulged in, a habit fre quently learned from evil companions, or at school, the effects of which are nightly felt, even when asleep, and, if not cured, renders marriage impossible, and destroys both mind

and body, should apply immediately. What a pity that a young man, the hope of his country, the pride of his parents, should be snatched from all prospects and enjoyments of life by the consequence of deviating from the path of nature, and indulging in a certain sccret habit. Such persons must, before conte--

DISEASES OF IMPRUDENCE.

When the misguided and imprudent votary of pleasure finds that he has imbibed the seeds

of this painful disease it too often happens that an ill-timed sense of shame or dread of discovery deters him from applying to those, who, from education and respectability, can alone befriend him, delaying till the constitutional symptoms of this horrid disease make their appearance, such as ulcerated sore throat, diseased nose, necturnal pains in the head and limbs, dimness of sight, deafness, nodes on the shinbones and arms, blotches on the head, face and extremities, progressing with frightful rapidity till at last the palate of the mouth or the bones of the nose fall in, and the victim of this awful disease becomes a horrid object of commissera-tion, till death puts a period to his dreadful sufferings, by sending him to "that Undiscovered Country from whence no traveller returns."
It is a MELANCHOLY FACT that thousands fall victims to this terrible disease, owing to the unskilfulness of ignorant pretenders, who,
